FECES FOR PARASITE SEARCH

Collection material:

- Container with screw cap and special scoop

Collection methods:

1. Place no more than three teaspoons of feces into the container, tapping in several places
2. Place any suspicious pieces that may appear to be pests into the container
3. Do not dirty the outside of the container
4. Close the container tightly

It is advisable to always carry out the collection for parasite research on three samples on three different days

Conservation:

Store samples at 4°C (in the refrigerator) until delivery.

Deliver the containers to the laboratory during opening hours.

In case of suspected amoebiasis, contact the laboratory microbiologist
