SCOTCH TEST

Collection material:

Transparent tape (not supplied by the laboratory)

Disposable gloves (not provided by the laboratory)

Collect the slides and the container in which to store the slides from the laboratory

Collection methods:

- Sampling should be performed in the morning before the patient unloads and/or washes.
- After wearing gloves, adhere a piece of tape the size of the slide to the ANO by applying pressure.
- Remove the tape.
- Apply it immediately to the slide, promoting adhesion with light pressure and possibly avoiding the formation of bubbles or creases.
- Place it in the appropriate container

It is advisable to always carry out the research on three samples on 3 different days

Conservation:

The container with the slide can be stored at room temperature for up to 3 days

In case of research on 3 samples it is possible to deliver them in a single day.
